Dear Recruiter,

I am an ambitious, detail oriented individual who has an extreme level of curiosity to explore, analyze and understand new concepts, and processes. I am very optimistic, fun loving who always has a bright smile on my face.

I enjoy handling big data, analyze them, visualize them and gather insights from them in order to add more value to the collected data. This keeps me enthusiastic and motivated to play around the data, learn more & help promote the organizational growth.

I would like to continue to develop my data science skills while creating a progressive and fun working environment.

I am well qualified and would be an asset to the organization since I have 8+ years of Computer Science knowledge & 2 years of industry experience.

Thank you for considering my application. I would appreciate the opportunity to interview and look forward to hearing from you in the near future.

Sincerely,
Muthu Priya
